PROFILE

Front-end web developer with hands-on project experience building responsive, API-driven web applications using HTML5, CSS3, and modern JavaScript (ES6+). Skilled in DOM manipulation, event handling, asynchronous data fetching, and API integration. Currently expanding my skill set into Zoho Creator and Deluge scripting, focusing on low-code application development, workflow automation, and system integration to solve real business problems. A fast learner who is keen to apply my web development foundation to design scalable, efficient solutions and build a long-term career within the Zoho ecosystem.

TECHNICAL SKILLS

- Zoho Creator, Deluge Scripting
- HTML5, CSS3, JavaScript (ES6+)
- Responsive Web Design
- DOM Manipulation & Event Handling
- Fetch API, Promises, Async/Await, HTTP Requests
- API Integration & JSON Handling
- Version Control: GitHub
- Tools: VS Code

EXPERIENCE

Zappyworks| *Incubation Trainee(Software Developer)*

- Developing business applications in Zoho Creator, using Deluge scripting to automate workflows and streamline processes.
- Implementing form validations, business rules, and integrations with other applications such as Zoho Books.

PROJECTS

Music Academy Managment System | *Zoho Creator* | *Deluge* | *Zoho Books*

- Developed an academy management application in Zoho Creator to manage Students, instructors, courses, batches, and class schedules.
- Designed custom forms, reports, and dashboards to track enrollments, attendance, and fee status in one place.
- Wrote Deluge scripts to automate workflows such as student registration and batch assignment.
- Integrated Zoho Creator with Zoho Books to automatically generate invoices and sync customer and payment records, eliminating manual billing entry.
- Implemented role-based access so admins, instructors, and students see only the data relevant to them.

Weather Dashboard | *HTML, CSS, JavaScript, Open-Meteo API*

- Built a responsive weather app that fetches live data from the Open-Meteo API and shows temperature, humidity, wind speed, and pressure with dynamic icons.
- Classified weather codes to update icons and backgrounds based on current conditions.
- Added city search with a fully responsive layout across devices.

Animal Information Web App | *HTML, CSS, JavaScript, API Ninjas*

- Developed a search-based web app that retrieves animal data (habitat, diet, taxonomy, characteristics) from the API Ninjas API.
- Implemented asynchronous data fetching using the Fetch API and async/await, with JSON parsing and error handling for failed requests.
- Designed a clean, responsive interface for a smooth user experience.

CERTIFICATIONS

- Java Beginner Certificate
- Typewriting (Certified)

EDUCATION

Madras University | *B.Sc. Mathematics, 2018–2021*
Little Jack Matriculation Higher Secondary School | *Higher Secondary, 2018*
Loyola Academy | *SSLC, 2016*

LANGUAGES

- Tamil — Native
- English — Conversational (spoken & written)

DECLARATION

I hereby declare that the above information is true and accurate to the best of my knowledge.
